

Dear all investigators and collaborators of TRAUMOX2

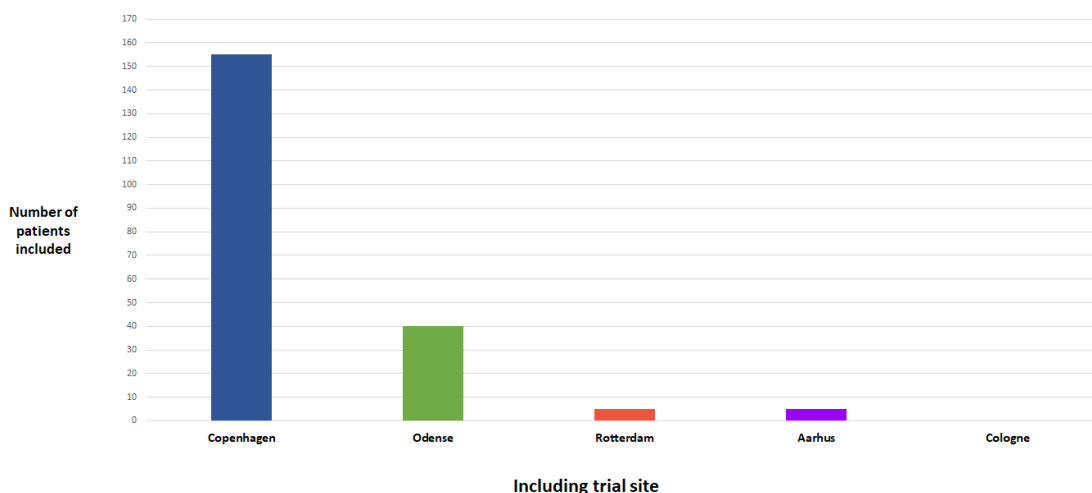

We are delighted to send out our 1st newsletter of the TRAUMOX2 study!

- 4 centres are now including patients: Copenhagen (DK), Odense (DK), Rotterdam (NL) and Aarhus (DK)
- We are still awaiting the ethical approval in Cologne (DE)
- Additional trauma centres across Europe have been invited to participate in the study and we are doing preliminary discussions regarding their potential participation

TRAUMOX2 inclusion

TRAUMOX2 inclusion

Focus area #1

It is important in the eCRF to use the codes for failure inclusion (FAILINCL), secondary exclusion (SECEX) and no consent (NOCONS) in the “Patient name” data field

With best regards

Jacob Steinmetz (sponsor)

&

Tobias Arleth (c. investigator)
