

## Dear all

- We have an approved collaboration agreement between Copenhagen and Bern (Switzerland) which is ready for signatures. Bern is currently awaiting their response to their ethics committee for start-up. We definitely hope to see Bern including in 2022!
- We are still awaiting the DMSC report; hopefully, the study can continue
- 4 centres are including patients: Copenhagen (DK), Odense (DK), Rotterdam (NL) and Aarhus (DK)

### Focus point

The data collection sheets from the randomisation envelopes must be entered as soon as possible in the data collection sheet instrument in REDCap in order for us to monitor possible major protocol violations and protocol deviations

With best regards

Jacob Steinmetz (sponsor)
