

Dear all

- We hope you are all doing well. We are extremely grateful for all your hard work with this study.
- We included the last patient 12.09.2023 and we have included **1517 patients from December, 2021 to September 2023**. Well done! 🎉
- We are currently doing the internal data validation with queries in REDCap, and you have all been replying nicely at a rate above expectations. We are close to the finish line! We are still aiming for the initial data analysis in the beginning of January, 2024. The drafting of the manuscript will be initiated in January as well. Below you can see the inclusion rate throughout the study and the final numbers of inclusions for all sites (from traumox2.org).

**Focus point**

We encourage you to complete the queries at your site in due time in close collaboration with us, and we will soon begin the more rewarding part of the process doing actual analyses.

With best regards
